Outline

1 Introduction

2 Another Section

Introduction

Basic Theme Slide with Bullets

- Itemized bullet number 1
  - Sub-bullet number 1.1
  - Sub-bullet number 1.2
- Itemized bullet number 2

Colourful Slide with a Numbered List

1. Enumerated item number 1
2. Enumerated item number 2

Another Section

Code with Syntax Highlighting

Example Python Code Listing

```
1 import numpy as np
2 x = np.zeros(5)
```

Example Theorem Environment

Theorem

The equilibrium point $\boldsymbol{x} = 0$ *of* $\dot{\boldsymbol{x}} = \boldsymbol{F}\boldsymbol{x}$ *is asymptotically stable if and only if the eigenvalues* λ_i *of* $\boldsymbol{F}$ *satisfy* $\mathrm{Re}\lambda_i < 0$

Example Alert Block

This is an Alert Block

Use this environment to draw attention to important stuff

Adding a Figure and Using a Blank Slide

- This is a standard bullet item

  This is another bullet item, but without the bullet
- Notice how to include a caption

Figure
This is the Queen's logo

Here is a Table Example

Table
This is an example of a table caption

Small column	Big column		
Grouped items	Item 1		
	Item 2		
Usual row	Spam	Bacon	Eggs

This Slide is Black and Has Maths

Try to integrate this function

$$x_0 = \int_0^\infty f_x(\tau) d\tau$$

where $\tau \in \mathbb{R}$ is a variable

Theorem

This is a very important theorem

This Slide is Blue and Has Maths

Try to integrate this function

$$x_0 = \int_0^\infty f_x(\tau) d\tau$$

where $\tau \in \mathbb{R}$ is a variable

This Slide is Grey and Has Maths

Try to integrate this function

$$x_0 = \int_0^\infty f_X(\tau) d\tau$$

where $\tau \in \mathbb{R}$ is a variable
